Introduction

Our story began in 2009. We take much pride in introducing MGM Corporation as Manufacturer And Exporter of all types of Home and Industrial Cleaning Products.

The founder of the company, Mr.Prithviraj Singh, is a BSc graduate from Mumbai University. Success was not easy and it took him a long time to build the business as he had to start the business from scratch. But today we are supplying our cleaning products to India's top Government Organizations, MNCs and to Overseas.

MGM Corporation is committed in fostering long term partnerships with suppliers and customers alike. We are dedicated to work closely with you, to provide optimal solutions quickly. Through close collaboration with our partners and our proactive sourcing capabilities, we provide a broad range of products, innovative services, and tailored solutions to meet your unique requirements.

With our expertise in manufacturing of disinfectants and sanitized solutions, we are confident of protecting your homes, offices and workplaces from harmful bacteria and viruses.

Washroom Cleaner

Code M1

Highly concentrated, Total Washroom Cleaner - Maintainer, Contains Highly Quality Surfactant & Solvents to Clean, disinfect, deodorise almost everything in washroom areas.

Furniture Polish

Code M4

No solvent and no wax, can be used on wood, furniture which has lost its luster overtime, remove dust, finger prints, oil, light lime and greasy film of all surfaces.

Multipurpose Cleaner

Code M2

MPC Known for its perfect cleaning ability, the offered cleaner is widely used for stains, oily surface, window all type of floor etc.

Air Freshener

Code M5

Innovative with fragrance development, packaging and processes to challenge industry norms and provide 100 % natural, environmental friendly air fresheners.

Glass Cleaner

Code M3

No ammonia, safer option for all types of mirrors, windows, glasses, office desks and computer screens.

Toilet Cleaner

Code M6

We use supreme quality chemicals ingredients and the contemporary techniques at our well equipped formulating setup.

Floor Cleaner

Code M7

Must floor cleaner is formulated with eco friendly chemicals, added natural fragrances. The provided cleaner is thoroughly tested on several quality parameters to ensure its quality & effectiveness

Carpet cleaner/ Shampoo

Code M101

Blended with high foaming surfactants and water miscible solvents. can be used with extraction machine to remove heavy stains

Bathroom Cleaner Concentrated

Code M9

With the strong assistance of our deft team of professionals, we are engrossed in offering highly effective BCC, that is largely used for removing stains from washrooms, tiles, washbasins taps, etc.

Lift Cleaner/Disinfectant

Code L100

Highly efficient, non-corrosive formula, spray-on and wipe off, streak free stainless steel surfaces.

Trichloroethylene

Code TCE-245

colourless non-flammable liquid with a chloroform-like sweet smell. Commonly used as an industrial solvent, degreasing for metal equipment.

Dishwash Liquid

Code KC- DW10

Highly Concentrated, dilutable product, cuts through grease quickly, lemon perfume

Degreaser/Oil & Grease Remover

Code KC-D88

High blend of surfactants, which remove oil and grease stains from stainless steel surface, wash basin, stove, etc.

Machine Dishwash Chlorinated Liquid

Code KC- D20

Concentrated chlorine sanitiser with built-in descaler, tough on caffeine and lipstick stains. Suitable for commercial use.

Degreaser/Oil & Grease Remover

Code KC-OVC10

Super concentrated, effortlessly cuts through grease, oil and food deposits, reduces cleaning time. Foamy liquid.

Machine Dishwash Surfactant Liquid

Code KC- R20

A blend of surfactants and drying agents. Leaves plates, crockery and cutlery spotless.

Stainless Steel Shining Cream

Code KC- SSC10

Use to shine stainless steel equipments, door, kitchen accessories like Kettle, commercial kitchen equipments.

POLISHES

Steel Polish

Code P-S4

Solvent/silicon based. cleans, polishes and protects stainless steel surfaces from marks, fingertips and dirt

Shoe Polish Cream

Code SPC-10

No wax no paraffins, no animals fats. Cream use for all type of leather to shine like mirror. Use for automatic shoe polish machine.

Furniture Polish

Code P-M4

No solvent and no wax, can be used on wood, furniture which has lost its luster overtime remove dust, finger prints, oil, light lime and greasy film from all surfaces.

Car Tyre Polish

Code AU-CTP10

Concentrated silicone based. Enhances over all appearance by leaving luster and shine in any weather. Gives a wet look.

Auto Care

Car Wash

Code AU-CW100

Powerful Formula. Contains no solvents, alkaline or ammonia. It washes away traffic grime, grease and dirt. Gentle on paint.

Car Dashboard Polish

Code AU-CDP10

Viscous milky liquid gives shine as good as a new car.

Car Shampoo

Code AU-CS100

High surfactant and high foaming gentle on paint. Gives foam using machine cleaning.

Car Outer Body Polish

Code AU-CBP10

Silicon base liquid. Gives sparkling shine on a car body.

White Phenyl

Code MW-11

White Phenyl is made by using original pine oil. Pine oil is natural disinfectant.

Concentrated Brown Phenyl

Code MB-11

Specially formulated using high quality emulsion & pine which is natural disinfectant. Pine oil kills, germs, viruses, bacteria, insects, cockroaches etc.

Scented Phenyl

Code MS-11

Scented Phenyl is formulated by using original aroma oil, which give you long lasting fragrance.

Antiseptic Liquid

Code D-SAL

Chlorhexidine gluconet & cetrimide solution base liquid kills 99.9% germs, Used as antimicrobial & antiseptic liquid.

Floor Disinfectant

Code D-BKC

BKC base highly concentrated floor disinfectant act as antimicrobial agent, use for domestic and general purpose.

Antiseptic Liquid

Code D-DAL

Chloroxylenol base liquid used in hospital & household as first aid and for antimicrobial cleaning purpose.

Disinfectant Liquid for Fogging

Code DFL-10

Hydrogen peroxide and silver nitrate base liquid use for disinfectant surface & environment.

Hand Wash Lotion

Code P-HW10

Use for general purpose cleaning at home & work stations.

Hand Sanitizer Ethyl Base

Code P-EHS01

Ethanol Base hand sanitizer can be use for domestic level.

Antimicrobial Hand Wash

Code P-MHW10

Chloroxidine base Antimicrobial hand wash kills 99.9% germs use at home, work stations and at general hospitals

Hand Sanitizer IPA base.

Code P-IHS01

Iso-propyl alcohol base hand sanitizer is widely used for critical area like clinics, Dental, Hospitals etc.

Antibacterial Hand Wash

Code P-AHW10

Specialy formulated for antibacterial purposes. Use at high contaminated area.

Shower Gel

Code P-SG100

High foaming, moisturizers with pleasant fragrance shower gel use for complete body wash.

Mechanical Hand Wash

Code P-MHW11

Use for mechanics which work for Industries like, Auto motive.

Shampoo

Code P-S100

High foaming, moisturizers with pleasant fragrance shampoo gel use for complete hair wash.

Laundry Liquid Detergent

Code LD - 200

Heavy duty, offering economical result, Lavender & Lemon fragrance.

Liquid Bleach

Code LD - 205

Medium strength, offering the advantage of being a whitener.

Laundry Liquid Premium

Code LD - 201

Concentrated formula specially, designed for top loaders, with a fresh perfume. Suitable for all types of fabric.

Colour Fixer

Code LD - 206

Protect & reduce fading tendency of Colored fabrics during washing. Retains their colour brilliance, Maintain Colour integrity of fabrics.

Grease & Stain Remover

Code LD - 203

Non solvent based rich blend of surfactant designed for cleaning toughest stains. Suitable for mechanic overalls.

Fabric Softener

Code LD - 207

Leaves clothes soft, nourishes and untangles cloth fibers damaged by washing Prevents fading & shrinking of clothes

Blood Stain Remover

Code LD - 204

Highly quality surfactant base solution for removing all type of blood stains from all types of fabric.

Aroma Diffuser Oil

Code AO - 101

100% Natural essential oils were designed to soothe and create a pleasant atmosphere with the help of the concentrated power of herbs. Ideally use for restaurants, hotels, homes, offices etc.

Variants In Diffuser Oils

1 LEMON GRASS OIL (Oil Base)	5 ARANCIA	9 DAVID OFF COOL WATER	13 PONDS
2 LEMON GRASS OIL (Water Soluble)	6 DRACKET	10 2244	14 DENIM
3 M5 - DREAM VALLEY	7 FRESH PINK	11 COFFEE / CHOCOLATE / VANILLA	15 D4
4 MAGNET	8 ROMANIA	12 AXE MUST	16 ENGLISH Lavendar

Water Base Air Freshener

Code - AF

For almost a decade to create the world's best 100% natural water base air fresheners without compromising on ethics or aesthetics. Our team relentlessly innovates with fragrance development, packaging and processes to challenge industry norms and provide 100% natural, environmentally friendly air fresheners alternatives for conscious urbanites over the world.

Water Base Air Freshener

1 LEMON GRASS OIL (Oil Base)	5 ARANCIA	9 DAVID OFF COOL WATER	13 PONDS
2 LEMON GRASS OIL (Water Soluble)	6 DRACKET	10 2244	14 DENIM
3 M5 - DREAM VALLEY	7 FRESH PINK	11 COFFEE / CHOCOLATE / VANILA	15 D4

All Purpose Sanitizer Concentrate

Code FI - 10

Non rinse, non perfume sanitizer. Ideal for use in food processing areas, soaking cutlery, bench tops, equipment, chopping boards and floors.

Milk Utensils Cleaner

Code FI - 14

Cetrimide solution base liquid kills 99.9% germs. Powerful cleaner, sanitizer to remove bacteria and bad odour.

Veggies and Fruit Sanitizer

Code FI - 11

Used to sanitize fruits and vegetables from all harmful bacteria that may be present on the surface.

Non-Perfumed Hand Wash

Code FI - 15

Use for general purpose cleaning at home & work stations.

RTU Sanitiser

Code FI - 12

Its superior blend of Quaternary Ammonium Compounds provides non-conventional hygiene activity assisting in complying with food safety regulations

Degreaser/Oil & Grease Remover

Code FI- 16

Water base multipurpose cleaner degreaser. Safely & effectively removes oil & grease from surface.

Milk Line Cleaner

Code FI - 13

Powerful cleaner - sanitiser to remove residues from milk lines, frothers, kills bacteria and bad odour.

Oven/Grill Cleaner

Code FI- 17

Highly Concentrated, solvent free, tough on grease, fats and food deposits, quick action. Foamy liquid.

Antimicrobial Hand Wash

Code HC-HW10

Chloroxidine base Antimicrobial hand wash kills 99.9% germs use at home, work stations and at general hospitals

Disinfectant Liquid for Fogging

Code HC-100

Hydrogen peroxide and silver nitrate base liquid use for disinfectant surface & environment.

Surgical Hand Wash

Code HC-SW10

Chloroxidine base Antimicrobial hand wash kills 99.9% germs use at hospital, OT and critical area.

Multi-Enzymatic Pre-Instrument Cleaner

Code HC-EIC

For Cleaning of Surgical Instruments, Endoscopes, Dental & all Other Type of Rigid & Flexible, probes.

Hand Sanitizer

Code HC-HS20

ISO-propyl alcohol base hand sanitizer is widely used for critical area like clinics, Dental, Hospitals etc.

Sodium Hypochlorite

Code HC-SH10

Sodium hypochlorite base liquid use for general disinfectant.

Waterless Surgical Scrub

Code HC-SC21

ISO-propyl alcohol base hand sanitizer is widely used for critical area like clinics, Dental, Hospitals etc.

Waterless Body Wash

Code HC-BW10

Ready to use antimicrobial for bed-ridden patients Free from Alcohol.

Povidone Iodine Solution

Code HC-PV10

Pre and post-surgical skin antiseptics, casualty procedures, against infections of burns, lacerations and abrasion.

Antiseptic Liquid

Code HC-SAL

Chlorhexidine gluconet & cetrime solution base liquid. Kills 99.9% germs use as antimicrobial & antiseptic liquid.

Surface Disinfectant for Critical Area

Code HC-CA10

Ideal for fumigation of critical area & surface disinfection. Broad Spectrum -highly Bactericidal, Fungicidal, Virucidal, Sporicidal.

Floor Disinfectant

Code HC-BKC

BKC base highly concentrated floor act as antimicrobial agent, use for domestic and general purpose.

Antiseptic Liquid

Code HC-DAL

Chloroxylenol base liquid use in hospital & household as first aid and for antimicrobial cleaning purpose.

Concentrated Brown Phenyl

Code HC-BP10

Specially formulated using high quality emulsion & pine oil which is natural disinfectant. Pine oil kills, germs, viruses, bacteria, insects, cockroaches etc.

STAIN REMOVERS

Stain Remover

Code OX-100

This product is widely used to remove tough stains from public toilets, yellow stains and tough carbon deposited spots from grouts of tiles.

Cream Cleaner/ Stain Remover

Code C - 44

Combination of powerful detergents and polishing agent, leaving the surface smooth & shiny. Use for removing salt water stains from taps, glass partition of washroom etc.

Stain Remover

Code OG-100

It can be used in food industry to remove oil & grease stain. Mostly used in bakery & ice cream manufacturing industry.

Cement Remover

Code CM - 48

Non solvent base cement remover used for removing cement stains before hand over of flats.

Stain Remover

Code L-S60

Solvent base product used to remove gum stains left after removing stickers.

Stain Remover

Code RL- 88

Product is used to remove tough stain of red betel leaf, spit by the commuters on railway platform or on door of trains.

Degreaser/Oil & Grease Remover

Code EN- 100

Non Water base multipurpose cleaner degreaser. Safely & effectively remove oil & grease from engine & automotive parts.

Degreaser/Oil & Grease Remover

Code DG- 88

Water base multipurpose cleaner degreaser. Safely & effectively removes oil & grease from engine parts stainless steel aluminum rubber, paint & automotive parts.

Toilet Cleaner

Code M6

We use supreme quality chemical ingredients and the contemporary techniques at our well equipped formulating setup.

Antimicrobial Hand Wash

Code P-MHW10

Chloroxidine base Antimicrobial hand wash kills 99.9% germs use at home, work stations and at general hospitals

Floor Cleaner

Code M7

Must floor cleaner is formulated with eco friendly chemicals, added natural fragrances. The provided cleaner is thoroughly tested on several quality parameters to ensure its quality & effectiveness

Hand Sanitizer

Code HC-HS20

Iso-propyl alcohol base hand sanitizer is widely used for critical area like clinics, Dental, Hospitals etc.

Dishwash Liquid

Code K-DW10

Highly Concentrated, dilutable product, cuts through grease quickly, lemon perfume

Antiseptic Liquid

Code D-SAL

Chlorhexidine gluconet & cetrimide solution base liquid kills 99.9% germs use as antimicrobial & antiseptic liquid.

Glass Cleaner

Code M3

No ammonia, safer option for all types of mirrors, windows, glasses, office desks and computer screens.

Antiseptic Liquid

Code HC-DAL

Chloroxylenol base liquid use in hospital & household as first aid and for antimicrobial cleaning purpose.

ANTIMICROBIAL NANO COATING SURFACE DISINFECTANT

PROTECTION AGAINST 99.9%
BACTERIA & VIRUSES

SURFACE DISINFECTANT

Airborne viruses endure in the air for a few minutes but ultimately settle upon surfaces. These surfaces include furniture, laptop, keyboard, mobile phones, door handles, lifts, etc. These surfaces are the highest transmitter of viruses. This revolutionary surface coating when applied on a surface, eliminates the virus coming in contact with it and does the same for a period of **90 days**.

FEATURES

- Long terms protection against all types of viruses for up to 90 days
- Applicable to multiple surfaces like glass, metal, wood, plastic, etc.
- Proven 99.9% effective against viruses & bacteria
- Resistant to all kind of washes and wear & tear after application, except hard scraping & alcohol-based cleaners
- Non-leaching and non-corrosive technology
- Certified by international & government approved laboratories

Military Barrel Cleaner Liquid

Code BC - 101

Introduction

Whenever an artillery gun is fired, particles of carbon, copper, lead, steel, or plastic are deposited inside the bore and chamber of the gun. Hence, over a period, these said particles will build up inside the bore. This build-up, also called fouling, causes reduced accuracy, and increases the chance of misfiring

Revolutionary Cleaning Method and Apparatus for Removing Oil, Grease, Carbon, Rust and Combustion Ammunition Residue from Barrels of Artillery Gun and Battle Tank with and without muzzle brakes, whereby cleaning fluid, bore brush and a winch are used to remove carbon, grease, oil, rust, and combustion ammunition residue from the barrel.

Key Words

Vappro ABC, Artillery Gun, Main Battle Tank, Muzzle Brakes, Ammunition Residue, Carbon Removal

ANTI SKID SOLUTION

National Safety Council states there are 25000 people injured and 245 die every day from unintentional slip on wet floor at home and work places. This number has created a need for Dr. Grip Anti Skid Solution that reduces the number of injuries and death rate.

Method of Application :

1. Wash Floor with Must surface cleaner
- 2 Wipe the floor with mop
3. Take Dr. Grip Solution in plastic container
4. Dip sponge or mop in the solution and apply on the required surface uniformly
5. Repeat step 4, 2 to 3 times
6. Wait for 30 to 45 minutes, wash with clean water, minimize the risk of slip for coming 12 months.

Area of application :

Washroom

Swimming Pool

Open Terrace

Stairs

Hotel Kitchen

Airport

SPECIFICATION FOR “must” DG-100, TECHNICAL

It takes many years by our R&D team to make replacement of TCE and finally with their long hard work, innovation of DG-100 being, with 100% replacement of satisfactory results. DG-100 is clear, colourless non-flammable liquid, duly used for removing oil and grease from all types of metal surfaces.

Benefits of DG-100

1. Replacement to Trichloroethylene
2. Non Flammable
3. Non-corrosive
4. Stable price for long term contracts
5. Smooth Availability
6. Made in India
7. Ammonia Free
8. Chlorine Free
9. No Harmful gases
10. Stable at Room Temperature
11. No Solvents/ No Diesel / Petrol / Kerosene / MTO

Metal Degreaser

Code DG-100

colourless non-flammable liquid with a sweet smell. Commonly used as an industrial solvent, degreasing for metal equipment.

Understanding Bacterial Digestion of Waste

BACTERIAL DIGESTION OF WASTE

AN INSTRUCTIONAL GUIDE ON THE FUNCTION OF BACTERIAL DIGESTANTS AND HOW THEY WORK TO DIGEST WASTE

Bacterial digestant products contain three necessary components

1. BACTERIA CULTURES
2. ENZYMES
3. ESSENTIAL NUTRIENTS

See how these three components work in harmony to digest organic waste QUICKLY and EFFICIENTLY, with NO ODOUR or NOXIOUS GAS.

The following discussion outlines the biological process of BACTERIAL DIGESTION. This process is responsible for the digestion of organic waste, no matter where it occurs.

With minor variations, this same process digests waste in:

Grease Traps, Drains & Plumbing, and Septic Systems Hog, Cattle, Chicken Manure Pits, Leaf and Grass Mulch

Municipal Sewer Treatment Operations, Including: Digesters, Oxidation Tanks, Trickling Filters and Ponds

Also Industrial Wastewater, Food Processing Wastes And Other Waste Disposal Systems

WHAT IS BACTERIAL DIGESTION?

Bacterial digestion is the process of bacteria consuming organic matter. The bacteria feed on the organic waste, deriving nutrition for growth and reproduction. Using complex chemical reactions, the organic waste is metabolized down to water and carbon dioxide (the final metabolic waste products), providing the bacteria with energy to sustain their life.

BACTERIA CULTURES

Thousands of different types of bacteria exist everywhere in our world, and most of them carry on bacterial digestion in some way.

However, some of them are found only in a particular place (environment), require specialized types of food, and/or have very unique biological roles (niches). A bacteria is a single cell life form - each individual cell is a separate, unique organism.

Bacteria often grow into colonies that appear as jelly-like masses, but each cell remains an independent, individual life. Bacteria reproduce by a process called cell division. A mature bacteria reproduces by dividing into two daughter cells, each identical to each other and the parent bacteria. Under ideal conditions, bacteria can reproduce very rapidly, producing a new generation every 20 to 30 minutes.

Following this reproduction process, we see that the number of individual bacteria doubles with each generation. The population explodes as the number of organisms increases logarithmically. This population boom begins soon after the bacteria is introduced into a favorable environment, after a short lag time when the bacteria becomes acclimatized to the new conditions. Obviously, this population cannot increase forever. At some point, the food source will be depleted, waste products will accumulate, or some other change in the environment will cause the population to level off or decrease (such as a change in pH, temperature, or oxygen content of the environment). Also, introduction of any poisons into the environment may have negative effects on the population, as well as competition from other types of bacteria. This is demonstrated by a population growth -chart for a typical bacteria culture

Organic Waste Management

Let's Make Our City Clean & Green

Municipal/Organic Solid Waste and it's Solution

ODOUR NEUTRALIZER CUM SOLID WASTE DECOMPOSER (must OP-100)

Due to rot of organic waste on landfill sites, generates harmful bacteria and pathogens.

Undesirable bacteria secretes toxic and hazardous gases which spreads in air and pollute cities.

Majority of the people living near dumping ground are infected with diseases like Asthma,

Allergies lung disease, lung cancers, children's sickness, respiratory syndromes and many more.

• PROBLEM :

- Illegal dumping damages the environment.
- Land, water, soil and air pollution caused by illegal dumping.
- Toxic & hazardous gases leads to many harmful diseases

• SOLUTION :

- Specially formulated bacteria secretes enzymes which break down organic waste & consume harmful bacteria.
- It works Aerobic, Anaerobic & facultative, biochemical process and it offers a low cost & eco-friendly method of converting the solid waste into a stable end product call Compost.

• BENEFITS :

- Non-corrosive & non-Toxic
- Almost elimination of harmful & toxic odour in air.
- No more generation of Methane gas ,
so no fire on land fill sites .
- Get fresh oxygen to people living near
dumping grounds, so no more diseases.

3. BAD ODOUR ELIMINATOR (MUST OL-100)

In most commercial rest rooms, the main source of bad odour is urine (Ammonia), Even small droplets of urine can be a breeding ground for bacteria. The more the bacteria profiles rates, the worse the odour becomes. Urine can remain on tiles, grout, behind the fixture, not free flowing due to choke up, due to which bad smells remain in toilet. Phenyls, air fresheners, urinal screens etc can give temporary and short time solution from bad odour.

1) PROBLEMS :-

- a) Bad odour comes from public toilets
- b) At fish market, if meat sits out for too long, it begins to rot and starts to smell very badly.
- c) Also bad odour comes from poultry farms/dairy farm, due to live stock, feed, housing manure & waste including carcasses.

2) SOLUTION :-

ENZYMES assist in breaking down organic odour causing bacteria. They consume the bad odour causing bacteria, therefore reduce malodour. This is done by the enzyme breaking down the organic material into smaller parts.

3) BENEFITS :-

- a) Non-corrosive & non-Toxic
- b) Elimination of bad odour .
- c) No more generation of harmful bacteria.
- d) Get fresh oxygen to people working at poultry farms, dairy farm, public toilet etc .

5L Hand Pump

6 to 8 mL dosage per pump.

Cube Spanner

For easy opening of drums caps and bungs.

500ML Hand Pump

2 to 3 mL dosage per pump.

Tigger (Normal)

Blue trigger to fit all spray bottles.

500ML Spray Bottle

5 Litre Can

20 Litre Can

35 Litre Can

50 Liter Can

200 Litre Drum
